

Matrix Medical Network Partnership for Free In-Home Health Visits

HAP partners with Matrix Medical Network (Matrix) to offer a unique health service that provides a free in-home health visit with a nurse practitioner for select HAP Medicare Advantage members. This partnership has now expanded to HAP Empowered MI Health Link members.

These home health visits are meant to enhance and supplement a member's relationship with their primary care physician. They are designed to be a comprehensive health assessment to address gaps in care related to:

- Risk adjustment
- Quality measures
- Care management

Health visits may include:

- Brief exams, including vital signs
- Active, inactive, and chronic medical diagnoses with associated medication
- Functional status and fall risk assessment
- Personal and social history of drug, tobacco, and alcohol screenings
- Diabetes and cancer assessments
- Depression screening
- Clinical assessment of the patient with management plan
- Preventive and chronic disease case recommendations
- Case management referral (if applicable)

After a health visit, Matrix Medical will send a summary of the results to the member's PCP.

If you have any questions about this partnership, please email providernetwork@hap.org. Be sure to put Matrix Medical in the subject line. If you have questions about the assessment and process, please contact Matrix Physician Support:
