

PCP Assignment for PPO Members

Health Alliance Plan PPO and Medicare Advantage PPO members may now have primary care physicians assigned to them. These PCP assignments will help with the coordination of care between PCPs and members.

PCPs may see these PPO members on their member panel reports on the provider portal. These PPO members either selected the PCP or were attributed based on previous claims experience. Any participating provider can see the PPO member even if they are not the PCP assigned on the member's record.
