

Partnership with Everlywell Health formally know as Home Access Health for In Home Screenings

HAP is partnering with Everlywell Health to provide members with easy-to-use, self-collected lab test kits for the following screenings:

- Colon cancer
- Diabetic HbA1c

Everlywell Health will mail an opt-out letter to members who need the above screenings. The member can opt-out of receiving kit(s) otherwise the kits will be mailed to them automatically.

The member will complete the test in the convenience of their home and return it to Everlywell Health. The results will be shared with the member and their provider.

This program is available for HAP Medicare members, HAP Empowered Medicaid members and HAP Empowered MI Health Link members.
