

## **Reminder - Pregnancy Resources Online to Help You Care for Your HAP Empowered Patients**

The Michigan Child Collaborative Care (MC3) program offers psychiatry support to primary care providers and perinatal providers who are managing patients with behavioral health problems, including:

- Children
- Adolescents
- Young adults through age 26
- Women who are contemplating pregnancy, pregnant or postpartum (up to one year)

You can find the attached flyer from MC3 and other maternity resources on our website. Please visit [hap.org/empoweredproviders](http://hap.org/empoweredproviders), then select *Maternity Resources*.

# MC3

## 1 IN 5 CHILDREN

have at least one diagnosable  
mental health condition<sup>1</sup>

## 1 IN 7 WOMEN

cared for by perinatal providers  
suffer from depression or anxiety<sup>2</sup>

**The majority of women and children who have depression or anxiety do not receive treatment. That's where MC3 comes in.**

The Michigan Child Collaborative Care (MC3) program began in 2012 and is funded by the Michigan Department of Health and Human Services. MC3 offers no cost psychiatry support to pediatric and perinatal providers in Michigan through same-day phone consultations to offer guidance on diagnostic questions, safe medications, and appropriate psychotherapy.

## How does MC3 work?

**Provider/clinic staff  
initiates consultation**

**Behavioral Health Consultant  
triages consult request and  
provides resources**

**Psychiatrist and  
provider connect**

**Consult summary  
sent to provider**

## How to sign up:

Visit  
**the sign up page on our website**  
or scan the QR code to sign up.

**734-474-0078**

MC3 is supported by funds from the Michigan Department of Health and Human Services

## MC3 Process

- Consult requests can be initiated by anyone in the practice with knowledge about the patient
- Consults can be submitted either by phone or online; regional phone numbers and a secure online form are available on our website
- Call with psychiatrist will need to be with the prescribing provider
- Behavioral Health Consultants (BHCs) can provide consultations on resources

## Who is eligible to participate?

Providers in Michigan are eligible to participate in the program. This includes MDs, DOs, NPs, PAs, and CNMs in family medicine, pediatric, OB/Gyn, and psychiatry practices.

## Additional Key MC3 Offerings

Telepsychiatry patient evaluations

Live and remote trainings offered regionally and statewide

Workflow analysis to better integrate screening, care coordination, and MC3 services

Local and regional behavioral health resource and referral navigation

Scheduled educational group case consultation with MC3 psychiatrist

## What is not included in MC3?

MC3 is not an emergency service. MC3 psychiatrists do not prescribe medication or provide ongoing treatment, but rather support providers as they provide care.

## MC3 Perinatal Expansion

The MC3 Perinatal Expansion is funded by the Michigan Department of Health and Human Service as part of the Governor's *Healthy Moms, Healthy Babies* initiative to make psychiatry consultations and integrated telehealth screening and counseling more widely available in select counties in Southeast Michigan. With this funding, the program is implementing the *High Touch, High Tech (HT2)* app in multiple prenatal clinics in Southeast Michigan with the goal of achieving full coverage. The HT2 app provides universal tablet-based e-screening for behavioral health issues while the patient awaits the OB appointment and allows immediate, real-time linkage to care coordination and brief counseling provided by specially-trained remote Behavioral Health Consultants. The program is also creating a virtual, interactive perinatal toolkit including resources for both providers and patients.
