

## **EyeMed Relationship Expands to Include More HAP Plans in 2022**

Currently, we work with EyeMed to manage HAP's routine vision service benefits (i.e., routine eye exams and hardware) for HAP Medicare Individual members and HAP Empowered Duals (HMO SNP) members.

Effective January 1, 2022, our relationship with EyeMed will expand. They will also provide HAP's routine vision service benefits for members in the following plans:

- HAP Commercial
- All ASO Groups
- HAP Group Medicare
- HAP Alliance Medicare Supplemental

HAP will maintain administration and management of medical and surgical vision services.

### **Network participation**

To provide routine vision services for our eligible members, you must participate with the EyeMed Insight provider network. Note:

- If you're already in the EyeMed Insight network, there is nothing you need to do.
- If you are not in the EyeMed Insight network, you can start the process to join the network today. Visit [eyemedinfocus.com/join/](https://eyemedinfocus.com/join/) and follow the steps.

To search for a routine vision provider in the EyeMed Insight Network, visit [hap.org/eyedoctor](https://hap.org/eyedoctor).

To search for a medical or surgical vision provider, visit [hap.org/find-a-doctor](https://hap.org/find-a-doctor).

### **Member benefits**

Prior authorization or referrals are not required to use the routine vision services benefit. Members have different benefit levels and copay requirements based on their HAP plan.

For more details about this partnership, watch the Provider Newsroom when you log in at [hap.org](https://hap.org).
