

HAP Offers Insulin Discount Program for Medicare Members

It can be hard to manage diabetes, so we've taken steps to help our Medicare members manage and maintain their good health. We're excited to offer our members discounts on insulin through our participation in the Part D Senior Savings Model Program for 2021. Here are the details of the program.

- HAP offers capped out-of-pocket costs for select brand name insulins on Tier 2 (generic cost share) and Tier 3 (preferred brand cost share) for a 30-day supply and a 90-day supply.
- HAP Medicare members will never pay more than **\$35 per month** for select insulins in the SSM during both **initial coverage phase and coverage gap phase** when they obtain the insulin from a HAP participating network pharmacy.

Important!

HAP Medicare members administering insulin with an insulin pump are excluded from this program. Per CMS, insulin administered with an insulin pump is a Medicare Part B benefit. It is not eligible for Part D SSM pricing and members will be responsible for Part B cost share.
