

## **eviCore Streamlining Prior Authorization Process**

November 24, 2020

Currently, we partner with eviCore to manage specific prior authorization requests for cardiology, radiology, musculoskeletal and sleep study services.

On December 14, 2020, eviCore is introducing IntelliPath technology that will streamline their prior authorization process. With this new technology, you should notice:

- More approvals will occur immediately
- Less time spent answering clinical questionnaires
- Less time in eviCore portals or on the phone with eviCore to submit authorizations
- Requests for additional information from eviCore less often
